Cloud Cap Technology Piccolo System Accessories
Outside Air Temperature Sensor (OAT)

The OAT provides measurement of the outside air temperature to enhance the performance of Piccolo based unmanned flight management systems. Interface to the Piccolo is easily established though any one of the PCC configurable analog to digital lines.

**Key Features**
- Pigtail connection for easy integration
- Conformal coat protection
- Adhesive heat shrink provided for additional protection
- No calibration required
- Compact design
- Supported in Piccolo software version 2.1.0 and later

**Specifications**
- Input current: 2mA or less
- Input power: 4.4 VDC - 45 VDC
- Operating temp: -40° to +80° C
- Sensor accuracy: +/- 2° C
- Pins are terminated with a tinned pigtail connector

**Dimensions in mm [inches]**
-高度: 45.70 [1.79]
-宽度: 33.50 [1.31]
-宽度: 10.00 [0.39]
