

# TASE400 LD

## Day/Night Imaging with Laser Designation

The TASE400 LD offers battlefield situational awareness with targeting capabilities through all periods of visibility. Our 7 inch SWaP+T sensor package offers unmatched daytime video performance with capability to locate, identify and engage long-range targets.

### MISSION CAPABILITIES & BENEFITS

- High performance and low SWaP at < 10.5 lbs. / 4.76 kg
- Day light camera and mid-wave infrared cameras with continuous optical zoom down to 2° FOV
- STANAG 3733 Compliant laser designator
- Onboard GPS/INS - no external IMU needed for geo-pointing
- Fiber Optic Gyro (FOG) stabilization
- Common control and operator interface across TASE family
- Environmentally sealed
- Onboard image processing capable of target tracking, scene steering and electronic image stabilization
- ViewPoint payload software features complete control of TASE payloads - integrated moving map, real-time mosaicing, Path-Track, and video recording
