

Current WMS Imagery URLs

Updated 7-24-12

WMS servers change their access URLs often. Cloud Cap does their best to keep the URLs built into the software up to date. If URLs change between releases, all known-good URLs will be posted here.

To add any of these layers copy and paste the URL into the Layer URL field at the bottom of the Add WMS dialog, and then click the Add Layer button.

Bing

You must replace "YOUR_TOKEN" with your Bing token.

Road:
